

PHASE MARK™

A SIMPLE SOLUTION TO A DIFFICULT TASK

ABOUT US

The phase clip is designed and manufactured by **NexGen Manufacturing, LLC**

PHASE MARK phase clips were developed as a multi use tool for the electrical industry.

The phase clip can be easily installed or removed from energized jacketed cable using a shotgun, making phase identification, cable ID placard installation and ABNORMAL/HOLD tag placement safe and efficient.

MATERIAL

The Phase clip is manufactured from Acrylate styrene acrylonitrile (ASA)

- Better weather resistance over ABS
- Excellent weatherability and is suitable in all outdoor applications
- Widely used in the automotive industry due to its great UV properties

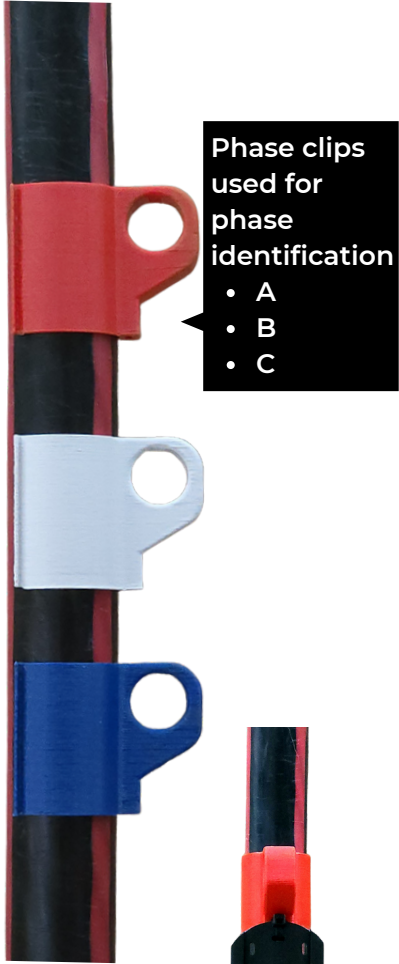

ELECTRICAL PROPERTIES

- A slightly polar material, with a high TG and low water absorption, the electrical properties are hardly affected by the temperature variation
- Frequency (up to 106 Hz) and humidity within normal working ranges.
- Dielectric Strength Value : 105 (kV/mm)

Used for placing tag

Combination

- **PHASE MARKING**
- Cable ID Placard
